

SO-7000 SōLIS Bluetooth/Wi-Fi Stereo Smart Speaker with Chromecast built-in

Listen to in High Definition with Amazing Sound

Available NOW!

Sit back and experience 360 degree room filling sound and the convenience of wireless streaming with the SōLIS® SO-7000.

The SO-7000 features Chromecast built-in, so choose from millions of songs from popular music services like Spotify, Google Play Music, and Pandora, or catch up on current events with NPR podcasts. New apps are constantly being added so there's no end to the music, online radio stations, and podcasts you can enjoy.

With the Google Home app you can stream music to a single speaker, different music to individual speakers, or create groups for multi-room listening. Simply tap the cast icon on any Chromecast-enabled app to begin streaming from your phone, tablet, or computer.

The SO-7000 also works with the Google Assistant, which allows you to use the Google Home unit to control any SōLIS model featuring Chromecast built-in. Change the music, adjust the volume or stop playback with your voice.

The SO-7000 provides high res audio streaming, Bluetooth connectivity and an auxiliary input for connecting a wired music source. Four strategically placed full range speakers driven by 50 Watts of power create a 360-degree enveloping sound field. A 5-inch woofer with tuned bass port is driven by a 50 Watt amplifier that belts out big-speaker, high impact bass.

The SO-7000's low-resonance wooden enclosure and classic high gloss black cabinet accent will compliment any room in your home.

Leave no note unheard with the SōLIS SO-7000.

MSRP: \$359.99
