

SO-7500 SōLIS Stereo Bluetooth Vacuum Tube Audio System

Listen to Amazing Studio Quality Sound

Available Late June

Vacuum Tube Technology - Pure Sound

Music lovers looking for a compact music system with Bluetooth streaming and high performance sound need to discover the Solis SO-7500. The Vacuum Tube/Solid State hybrid amplifier and companion speakers are perfectly matched for truly amazing sound. You won't believe your ears when you hear the quantity and quality of music coming out of this petite system.

The SO-7500 has everything you need to enjoy big component-system performance in a compact package. The classic high gloss black cabinet finish is accented with two preamp vacuum tubes. Each two-way bass reflex speaker takes up less than 6" of shelf space, yet will startle you with their life like clarity and room-filling sound.

The SO-7500 includes Bluetooth for wireless streaming from your phone or Bluetooth device, and two auxiliary inputs for connecting other wired devices - great for listeners who have multiple music sources. The unit delivers 2 x 12W (RMS) and operates on 120V AC power.

Leave no note unheard with the SōLIS SO-7500
